Re Item V

**Reasoned statement with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement**

Reference is made to the following documents:

D1: US 2003/101339 A1 (BIANCHINI PAOLO ET AL) 29 May 2003 (2003-05-29)

D2: US 2003/167314 A1 (GILBERT MARTYN ET AL) 4 September 2003 (2003-09-04)

Subject-matter:

The present application relates to a system (claim 1) and to a method (claim 4) for enhancing the security of the e-mails transmitted from a sender to a receiver.

Prior art:

The closest prior art was found in document D1 (see in particular abstract). This document relates to a method and system for transmitting sensitive information over a network.

Differences (Article 33 (2) PCT):

The difference between the independent claims of the present application and the prior art resides mainly in the specific concepts of the Message Transfer Agent (MTA) splitter and MTA assembly agent.

Problem:

The objective problem solved by the above-identified difference is to improve security for e-mail transmissions.

Inventive step (Article 33 (3) PCT):

The independent claims solve a technical problem in a way (MTA splitter divides the e-mail into a plurality of chunks according to a predetermined algorithm and a predetermined list of relay MTAs to which are forwarded said chunks, and the assembly agent reassembled said received chunks using said predetermined algorithm), which is not disclosed or suggested in the prior art (D1 and D2), and therefore they are considered to be inventive.
